Article 4 – About the admission test

4.1 – Test method
The admission test for the International MD Program reserved for non-EU candidates is **home-based** and takes place with an **online proctoring system** on the dates indicated at Art. 3 of this Call.

4.2 – Technical information for the admission test
Starting 5 days prior to the test date technical requirements and instructions for the admission test will be sent from the e-mail address convocazioni@ilmiotest.it to each candidate's personal e-mail address indicated during the online registration procedure.

Should the communication from convocazioni@ilmiotest.it not be received it is advisable to check the SPAM box. If the e-mail is not found in the SPAM box either, it is necessary to contact Selexi at convocazioni@ilmiotest.it asking them to send the communication again.

Candidates are responsible for verifying the speed, stability and quality of the signal in the location where the test is going to be taken.

Candidates are considered solely responsible for possible signal interruptions that may occur during the admission test that would prevent them from partially or fully completing the exam.

Should the bad signal or a signal interruption impede the proctor's monitoring of the location where the test is being taken the Head of the Selection Procedure, in agreement with the Commission, has the authority to exclude the candidate from the competition.

Candidates are required to follow any further instructions or technical details Selexi might provide before or during the test.

By activating the video connection candidates give their consent for the video recording and the collection of personal data necessary for the time tracing and reconstruction of each phase of the test.

4.3 – Technical requirements

In order to take the test, it is necessary to have:

1. A laptop (operating system Windows 8 or later versions or LINUX) or a MAC PC (MAC-OS 10.14 or later versions) with webcam and microphone.
2. Browser GOOGLE CHROME (81.0 or later versions). No other browser has to be used.
3. Internet connection with a minimum upload and download speed of 1.5 Mbps.
4. A smartphone or tablet (Android 4.1 or later versions – iOS 8 or later versions) with functioning webcam.
   It is recommended to use a wi-fi connection.
   Candidates will be required to download an APP (34 MB) available on Google Play for Android or App Store for iOS on the smartphone or tablet used for the test.

Please note that a tablet may be used in place of the smartphone alone and NOT of the laptop or MAC.

Should a candidate make and pass the technical checks using devices with lower technical features than those indicated above, **the possibility to take the admission test is not guaranteed** and possible technical problems that may occur during the exam are the candidate's responsibility alone.

4.4 – Check requirement

Starting 5 days prior to the test date candidates will receive instructions via e-mail, as indicated at point 4.2, for the technical checks ('check requirement').

In particular, candidates must:

- Install the Google Chrome ProctorExam plug-in, needed for the video surveillance during the test;

Candidates must follow the procedure to test the correct setup and operation of:
- PC's or Mac's audio and microphone;
- PC's or Mac's webcam;
- Smartphone's or tablet's webcam;
- internet connection.

At the end of the check requirement, candidates receive a second e-mail from convocazioni@ilmiotest.it with the link to access the exam and the date and time frame to take it.

If the indicated time window is not strictly respected, the candidate will not be allowed to take the test.

4.5 – Taking the test
On the day of the test, candidates must proceed with the connection of the devices already verified during the 'check requirement' and with the recording of the workstation and the location where the exam is going to take place using the webcam of the smartphone or tablet.

Subsequently, candidates must connect the smartphone or tablet to a socket and place it behind them so that it can always frame the surrounding environment.

The identification procedure requires candidates to show and take two photos: one photo of the identity document and the other one of the candidate's face.

The accepted identity documents are:
- identity card;
- driving license with photo;
- passport;
- firearms license.

It is allowed, after remote verification by the proctor during the identification phase, the use of **two sheets of white paper and a pen** to carry out any calculations.

At the end of the setup of the workstation and the identification phase, candidates must click on the link to the exam where a page with instructions for taking the test and for using the exam's application (e.g. duration of the test, scores for the answers, mode of operation, rules of behaviour to be observed) will appear.
Candidates will have the necessary time to read the operating instructions and will have to wait until the test begins.
Candidates who log in after the identification phase has ended or without a valid identity document will not be admitted to the test, regardless of circumstance.

Candidates who are absent from the test after the closure of the identification procedures will be considered as renunciative.

The duration of the waiting time may vary depending on the progress of the identification operations for all the expected candidates.

In case of need, it will be possible to contact the technical assistance using the Chatbox available on the platform for the entire duration of the identification procedures and the test itself.

At the end of the identification phase, the "Start the Test" button will appear on the screen. At that moment the candidate must click on the button and start the test.

During the test, candidates are allowed to use exclusively their own PC or MAC without any additional screens, keyboards, mouse or other external devices.

At the end of the time scheduled for the test, candidates must log out by clicking on the specific button and then on the "End test" button.
If a candidate finishes the test before the time limit expires, they can click on the "Close the test" button and then on "Logout" and "End test".

4.6 – Reasons for exclusion from the test
connection interruptions that exceed the time frame of 5 minutes due to problems related to the devices used by the candidates or the poor Internet connection will result in an assessment by the Head of the Selection Procedure on the legitimacy of the continuation of the test;

Candidates are required to observe the following provisions, under penalty of exclusion from the test:

1. the room must be adequately lit, isolated, silent, equipped with a single access door which must remain closed for the entire duration of the test;

4. the use of headsets or other technological tools such as smartphones, smartwatches, calculators or glasses equipped with a video camera or camera is not allowed;
5. the use or consultation of other applications, browsers or web pages is not permitted;
6. the use of books, notes or handouts is not allowed;
7. no other person than the candidate is allowed in the room;
8. it is not allowed to talk with other people;
9. it is not allowed to leave the room for any reason, even physiological;
10. It is not allowed to use ear plugs.

Proctors will report all potentially or evidently fraudulent behavior to the Head of the Selection Procedure. If anomalies and/or irregularities are found both live streaming and/or in the subsequent phase of verification of the recordings, **the candidate will be excluded in toto from participation in the competition. In case the violation of the testing rules is committed during the first test session, the candidate will not be allowed to participate in any subsequent test sessions scheduled for the academic year 2026/2027 and will be excluded from the ranking list. In case the violation of the testing rules is committed during the second test session, the candidate will be excluded from the ranking list and the result of the first test session taken will be nullified.**

4.7 - Conditions for the establishment of and participation in a spare session

In the event of a disconnection of the examination platform due to proven technical and / or connectivity problems (for example: loss of connection or power supply of the user's terminal, interruption of services by the connectivity providers or electricity) not ascribable to the candidate, that impacts on the user's terminal or if for the aforementioned reasons the possibility of starting the test is inhibited, the possibility of carrying out a second test in a pre-established spare session will be given.

The spare sessions will take place in the same way as provided for in points 4.5 and 4.6 of this Call.

In the event of a disconnection of the examination platform not ascribable to the test provider, the candidate will be assigned the test score acquired at the time of disconnection if it is not possible for them to reactivate it.
In the event of disconnection of one or more video devices necessary to allow video surveillance (e.g. smartphone and / or tablet), for a period of more than 5 minutes, the Head of the Selection Procedure assisted by the test provider and by the Commission for admission tests will assess whether to allow the candidate to proceed with the test or to determine its cancellation.

<u>4.8 – Candidates with disability or with SLD</u>

According to Italian Law 5 February 1992 n. 104 or other laws applicable to international candidates, candidates with any kind of permanent or temporary disability in need of supportive measures must formally request the support they need for the admission test in relation to the extent of their disability.

Candidates with learning disabilities according to the Italian law 8 October 2010 n. 170, stating "*New regulation concerning specific learning disabilities within the educational environment",* or other laws applicable to international candidates, can request the special terms envisaged by the Ministry of University and Research Ministerial Decree 12 July 2011 n. 5669.

Candidates with special educational needs (SEN) are excluded from this case.

To submit the request for test accommodations, candidates are required to follow the procedure described below directly on the UniSR Admission Portal, by the registration cut-off date and time, as mentioned in the previous art. 3.1:

1. **Upload a valid medical certificate** (including any planned revision) to support the request.
As defined by Law n. 170/210, candidates with specific learning disabilities (SLD) must to upload a valid certificate issued by National Health System bodies or specialists or private health institutions recognized by the National Health System.

The diagnosis must be updated after three years if it was issued before the age of 18, without prejudice to any extensions of its validity granted by the competent authorities. There is no obligation to update the diagnosis if it was issued after the age of 18.
The submitted certifications are valid for the purposes of the admission test only if their expiration date falls after the publication date of this call for admission.

2. **Enter the request for test accommodations:**

- extra time (50% additional time will be granted in case of duly certified temporary or permanent disability; 30% in case of SLD);

- non-scientific calculator (candidates' choice: either external, to be shown in camera for checking, or internal to the platform);

5.1 – Reserve questions and deleting procedure

At the end of the test (i.e. at the end of the 80 minutes or if the candidate decides to finish the test earlier) every candidate will have to answer **7 extra questions** in a time which is proportional to the time given for the entire test and which is calculated automatically by the software. These reserve questions are coherent with those of the test and **WILL NOT count as part of the test** but will only be considered if, at the end of all scheduled sessions, an anomaly should emerge on one or more questions. Only in this case, the Head of the Selection Procedure, after having received the Committee's opinion, can decide to delete that particular question and substitute it with one of the extra questions on the same topic.

Article 6 - Ranking list
In order to verify the candidates' compliance with the testing rules and in order to process the final results, all tests will be re-examined at the end of the sessions using the video recording of ProctorExam.

At the end of each admission sessions, the tests will be corrected anonymously and automatically and the related scores will be calculated.
Each candidate will then have to access to the **Online Review** made available through the university website https://www.unisr.it/en/servizi/graduatorie-immatricolazioni .
By accessing the system they will be able to view only the personal score obtained after the first test session and both the correction of the tests taken and the relevant scores obtained after the second test session.

The final ranking list will be drawn up considering only the best score obtained by each candidate among the tests taken.

In case of a draw, the points scored by the candidate in logic and problem solving, reading comprehension, biology, chemistry, mathematics and physics will prevail in descending order.

In case of a further draw, the place is assigned to the youngest candidate.

The final ranking list will be published within 15 days following the last test session on the University's online Board https://www.unisr.it/ateneo/albo-online and on the dedicated pages of the website https://www.unisr.it/en/servizi/graduatorie-immatricolazioni .

Only notices and ranking lists published on the University website are official communications. Possible personal communications sent to the candidates' e-mail address indicated during the online registration are merely intended to help them through the whole procedure and do not replace the official ones published on the website.
