ART. 8

Tasks of Recruitment Committees and examinations

The recruitment of fixed-term researchers is carried out following selection procedures that ensure the comparative assessment of the candidates and the publicity of the documentation.
The criteria and procedures for the evaluation of the candidates are established by the Committees, without them having had access to the documentation submitted by the candidates.
The names of the candidates may also be published on the University website once the Recruitment Committee has defined and published the assessment criteria.

Recruitment is carried out, once the Recruitment Committee has verified the admissibility of the applications, by means of a preliminary assessment of the candidates with a reasoned analytical appraisal of their qualifications, curriculum and scientific production, including their PhD thesis, in accordance with the criteria and parameters established by Italian Ministerial Decree no. 243 of 25 May 2011.

Following the preliminary assessment, the comparatively most deserving candidates, representing between 10 and 20 percent of the total number of candidates, and in any case not less than six, are admitted to a public interview with the Committee on their qualifications and scientific production, which may also take the form of a seminar open to the public.
All candidates shall be admitted to the interview stage if six or fewer applications are received.
During the interview, candidates will also have to take an oral examination aimed at demonstrating their adequate knowledge of the **foreign language,** as set out in the annex to the call for applications of the selection procedure in which they intend to participate.
The interview and oral examination session is public.
The convocation for the interview and oral examination will be sent by certified e-mail (PEC), or by registered letter with return receipt only for those who do not have a certified e-mail address, no less than fifteen days before it is due to take place, stating the day, month, time and venue and/or method (face-to-face or by remote connection in accordance with the indications provided by the Recruitment Committee) in/with which the discussion and exam will take place. For electronic connections, the workstation from which candidates will have the interview and oral examination must be equipped with a

webcam - which is essential for identifying the candidate - a microphone and headphones and/or speakers.

Failure by a candidate to attend the interview or failure by a candidate to the remote connection of the interview will be considered an explicit and definitive demonstration of his/her decision to withdraw from the selection assessment.

Following the interview, points are awarded to the qualifications and each of the publications submitted by the admitted candidates, on the basis of the criteria established by the Committee at the preliminary meeting.
The Committee identifies the successful candidate and provides adequate justification for its decision.

The Committee also draws up a ranking based on the scores obtained for the qualifications and publications assessment.
In the event of equal merit, preference shall be given to the younger/youngest candidate.

When determining the criteria and methods for evaluating candidates, the Recruitment Committee may decide to establish a minimum score below which candidates will not be included in the merit ranking.

The records of the Committee consist of the minutes of the individual meetings, of which the judgments, the scores awarded to each candidate and the reasons for the choice of the successful candidate form an integral part.

The Committee may make use of electronic virtual meeting systems in accordance with the provisions of Article 9 of the University Regulations for the recruitment of researchers on fixed-term contracts, pursuant to Article 24 of Italian Law no. 240/2010, issued by Rector's Decree no. 8766 of 15 February 2024.

The Recruitment Committee must complete the selection procedure within 4 months of the appointment decree being issued. The Rector may extend the deadline for the conclusion of the procedure by a further two months for proven and exceptional reasons disclosed by the President of the Committee. If the proceedings have not been completed after the extension, the Rector shall, by reasoned decision, initiate the procedures for replacing the members responsible for the delay, at the same time setting a new deadline for the completion of the proceedings.

ART. 9
Verification of documentation compliance and call proposal

The procedure documentation is approved by Rector's Decree.
If noncompliances are found, the Committee documentation may be returned to the Committee with a duly substantiated order to remedy the noncompliance and the deadline for this activity.

The Faculty Council that requested the call for applications deliberates on the call of the successful candidate, which is approved by the Board of Directors.
In the case of withdrawal by the successful candidate, the Faculty formulates, in accordance with the procedures described above, a new call resolution on the basis of the merit ranking list drawn up by the Committee and referred to in Article 8 above.

This ranking is only valid if the successful candidate withdraws from the call or is not recruited.

ART. 10
Conclusion of the contract

The successful candidate shall enter into a fixed-term contract of employment under private law with Vita-Salute S. Raffaele University, governed by the applicable current provisions, also with regard to the tax, welfare and social security conditions provided for employees' income.
