FACULTY OF MEDICINE AND SURGERY

Master's General Info

Master's Title	Coronary Interventional Cardiology
Level	2° level
Director	Prof.ssa Alaide Chieffo
Academic Year	2026/27
Duration	12 months
ECTS	60
Language	English/Italian
Admission requirements	Degree in Medicine and Surgery with qualification to practice.
Preferential qualifications	Specialization in Cardiology and/or Heart Surgery
Learning objectives	The Second-Level Master's Degree in Coronary Interventional Cardiology aims to provide participants with comprehensive and up-to-date theoretical and practical training in the field of interventional cardiology, enabling them to make appropriate treatment decisions in light of scientific evidence and advances in percutaneous revascularization techniques. Participants will be guided from the fundamentals of diagnostic coronary catheterization through performing percutaneous coronary angioplasty as primary operators. In addition, candidates will be exposed to the use of intracoronary imaging techniques (Intravascular Ultrasound – IVUS and Optical Coherence Tomography – OCT), the study of coronary physiology (Fractional Flow Reserve – FFR; Coronary Flow Reserve – CFR; Index of Microcirculatory Resistance – IMR, etc.), and invasive coronary functional testing.
Employment sector of reference	Candidates best suited for the Master will have a Specialization in Cardiology and or Heart Surgery
Delivery	One year duration Full-time in presence
Structure of training activities	Frontal teaching activities (10.5 ECTS) will be held in person, according to a schedule that will be defined by the Program Direction at the start of the Master's program. Practical activities and Practical Training (39.5 CFU) will also take place in person, according to the arrangements and schedule agreed upon with the Program Direction and tutors. The training is completed by the development, design, and drafting of an interventional cardiology protocol, including the preparation of a clinical-experimental thesis (10 CFU).
