Master's General Info

Master's Title	International Translational Medicine
Level	2° level
Director	Professor Chiara Bonini
Academic Year	2026/27
Duration	Two-year program
ECTS	60 ECTS
Language	English
Admission requirements	Master's Degree in Medicine and Surgery Master's Degree in the following disciplines: • Biomedical and Biotech; • Health Professions; • Biological, Scientific and Mathematical-Statistical; • Legal, Economic and Socio-Political.
Learning objectives	The Master's in International Translational Medicine is designed to train professionals capable of transforming scientific discoveries into concrete clinical solutions, with a direct impact on the patient health. At a time when translational medicine is revolutionising the way research and clinical practice are integrated, this programme offers an innovative and interdisciplinary perspective, driven by action and sustainability. Developed in collaboration with the Eureka Institute for Translational Medicine, the Master's programme draws on an international network of faculty members, researchers, clinicians, entrepreneurs, and stakeholders from universities, research centres, biotech industries, and regulatory bodies. The partnership with Eureka ensures an advanced educational approach focused on patients and on the social impact of research. The programme is delivered entirely in English and stands out for its hands-on approach, combining lectures, practical activities, project work, and simulations. Students will have the opportunity to participate in intensive workshops, mentoring sessions, and exchanges with international colleagues and institutions, fostering the development of strategic, communication, and ethical skills. The Master's program is designed for individuals who wish to work at the intersection of science and clinical practice, playing an active role in
