ADVANCE TRAINING COURSE

**Theoretical
and practical Courses
in Cardiac-Surgical
simulation**

GKSD healthcare
GRUPPO SAN DONATO

GKSD Investment Holding Group

**I.R.C.C.S. Policlinico
San Donato**

Gruppo San Donato

Presentation

Simulation training can no longer be an option but must be a mandatory part of surgeons' training.

For this reason, it was decided to organize the first training and simulation course at the **IRCCS Policlinico San Donato** that allows young surgeons to improve their surgical performance by performing surgical simulations on models of heart diseases in absolutely **cutting-edge 3D printing**, thus shortening their surgical preparation.

Program Structure

The course, unique in its kind, combines **front-learning modules** and **hand-on training**.

Various sessions of the course are planned for this year; each course, which last **1 or 2 days**, consist of a theoretical and a practical part, during which doctors can perform two surgeries per day.

Core Objectives

The program, aimed at residents and specialists in cardiology and cardiac surgery, has the objective to **practice on 3D-printed heart models** of pathological hearts performing complex procedure.

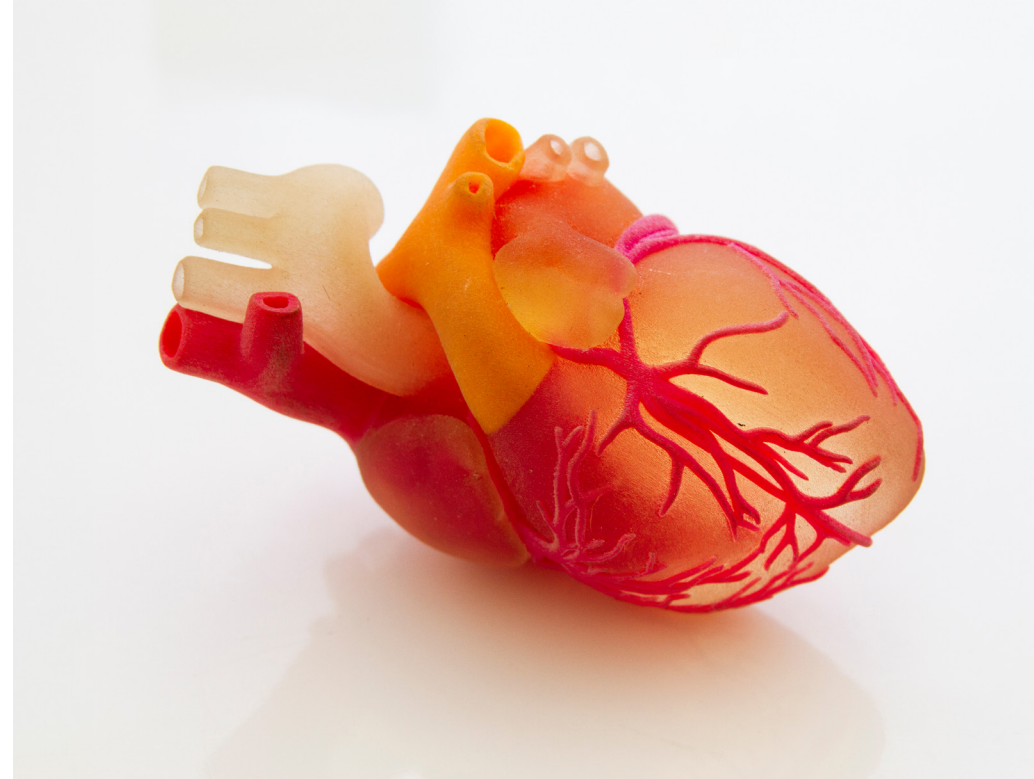

By the end of the course, they will be able to perform the same procedures.

Faculty

The teaching staff of the course is made up of teachers who are specialists in Cardiology, Cardiac Surgery belonging to the Faculty of Medicine and Surgery of the **Vita-Salute San Raffaele University** of, as well as by the doctors of the **IRCCS Policlinico San Donato**.

Theoretical and practical Courses in Cardiac-Surgical simulation

Scientific Head
Dott. Lorenzo Menicanti
Course Director
Dott. Alessandro Frigiola

**POSITION AVAILABLE:
10-12 PER EACH COURSE**

**THE COURSE PROVIDES
ECM CREDITS**

LANGUAGE: ENGLISH

**LOCATION: TRAINING
CENTER IRCCS POLICLINICO
SAN DONATO**

**TARGET: RESIDENTS
AND SPECIALISTS
IN CARDIOLOGY
AND CARDIAC SURGERY**

**4 SESSIONS FOR THIS YEAR:
1 OR 2 DAYS EACH SESSION**
